

PRODUCT INFORMATION

The new MINOX BL 8x52 and BL 10x52 with comfort bridge

Uncompromising comfort and performance

The two new models MINOX BL 8x52 and BL 10x52 introduced by the optics specialists from Wetzlar extend the series of exceptionally lightweight, yet powerful binoculars with comfort bridge. With a compact design and ergonomic features these two new models excel from dawn to dusk and on into the moonlit night. The comfort bridge guarantees convenient handling and an excellent grip – even in extreme situations. This open design enables a reliable, single-handed operation that allows more freedom to move when out hunting or observing nature.

The letter L in the name stands for “lightweight” and this is ensured by the

sturdy rubber-armored body of polycarbonate and the ergonomic features. Thanks to a sophisticated sealing technology the new BL binoculars are also watertight to a depth of up to five meters. A nitrogen filling prevents fogging of the optical surfaces, even under severe temperature fluctuations.

The powerful light-gathering optical systems feature multicoated lens elements that guarantee the best optical performance and neutral color rendition of the object in view. Thanks to the roof prisms with phase-correction coating the user benefits from an image with exceptionally high detail rendition and pin-sharp contrast, also in low light conditions.

And the specific requirements of people wearing glasses are also accounted for. With the extended eye relief the entire field of view can be enjoyed without vignetting, even if the user is wearing glasses. Twist-type retractable rubber eyecups with individual click stops are another convenient feature.

The scope of delivery of the new MINOX BL 8x52 and BL 10x52 with comfort bridge includes a nylon strap as well as an ever-ready case.
